

Traction Tread Safety Grating

ABOUT QIUSUO

Hebei Qiusuo Wire Mesh Products Co.,

Ltd., located in Anping , Hebei, China, isa professional perforated metal and wedge wire screen manufacturer &supplier. Our perforated metal safety grating products ranging from Perf O-grip safety grating, grip-strut safety grating, traction thread safety grating, interlocking safety grating, variety anti-slip holes pattern safety grating and its accessories.

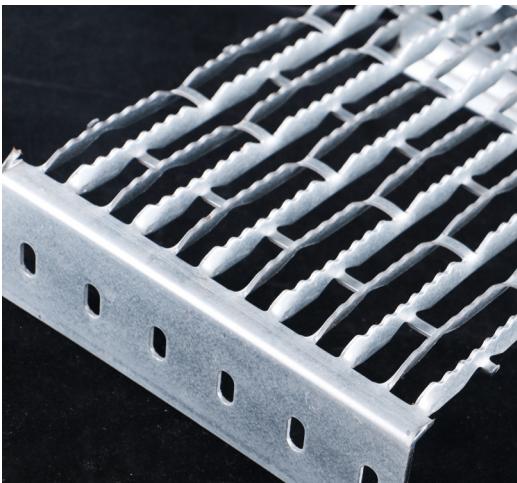

We have professional experienced products engineer, technical worker, technical sales consultant, sales engineers, purchasing team, QC team, engineering design team. we are swiftly evolving into a solution-oriented manufacturer and supplier, continuously optimize supply chain and manufacturing capabilities, continuously improve procurement capabilities, quality control capabilities, product development and design capabilities, and customize high-quality products to meet the individual needs of customers in multiple industry fields.

Please send us your drawing, picture or idea, we are glad to answer and resolve all your issues, not only doing regular products, and we also aim to supply more tailored solutions and products for every project.

- 14** Accessories for Standard Traction Tread Safety Grating
- 14** Application

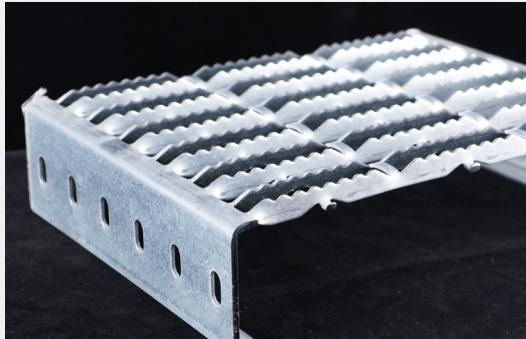

BRIEF INTRODUCTION

Personal safety has always been a highly valued issue in the process of industrial production and building construction. Safety gratings can effectively avoid the occurrence of this problem. According to different application environments and ant-skid grade requirements, we produce and offer the safety gratings with different patterns. Main products include grip-strut (diamond-grip) safety gratings, O-grip safety gratings, traction grip safety gratings and interlocking safety gratings.

GENERAL MATERIALS

Pre-galvanized carbon steel

Galvanizing process can effectively prevent steel corrosion and rust, so as to prolong the service life of steel.

HRPO carbon steel

Hot Rolled Pickled and Oiled (HRPO) steel is produced to protect the steel from rust and corrosion. This type of material is good for fabricating, welding, bending and cold forming. Finished products have a clean and flat surface that can be used in a variety of applications.

Aluminum

We adopt 5052-H32 aluminum as material. Its main alloying element is magnesium, which has excellent formability, corrosion resistance, weldability and medium strength. The load capacity of 5052-H32 aluminum can be up to 0.5 lbs./ft.

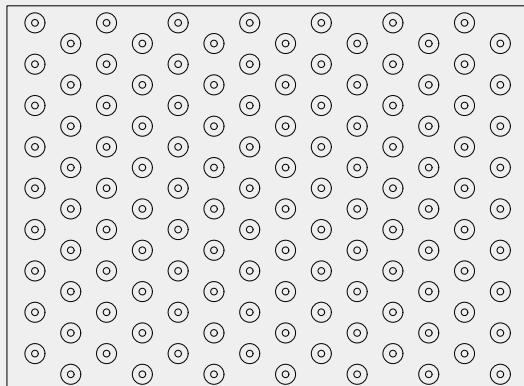

Stainless steel

Stainless steel has good corrosion resistance, heat resistance, low temperature strength and mechanical properties. It also has good hot workability such as stamping and bending.

TRACTION TREAD SAFETY GRATING

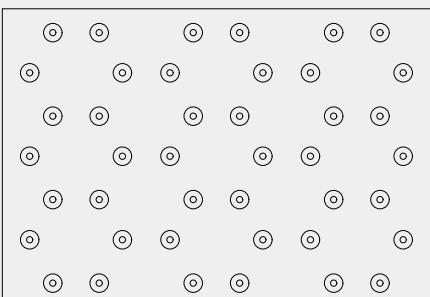

Traction tread safety grating is famous for its hundreds of perforated buttons. The unique designed traction perforations are used for drainage of the oil, water, ice, mud, detergent and any other small objects. These punching holes can be arranged into various patterns, including star, square, rectangular, OEM, drain hole and dimple only. It can be used as a reconditioning material for existing surfaces where does not provide anti-slip properties.

Moreover, it is compatible with all types of shoes including high heels.

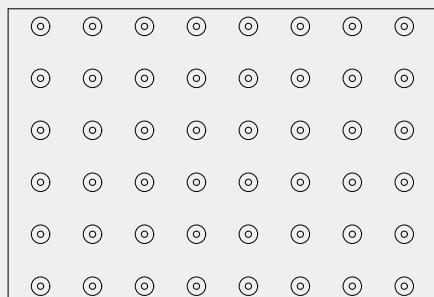

Standard pattern

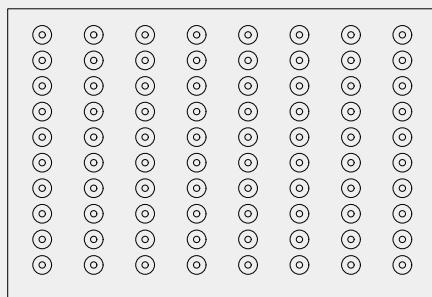

Except for standard pattern, there are six special pattern design provided for your different requirements.

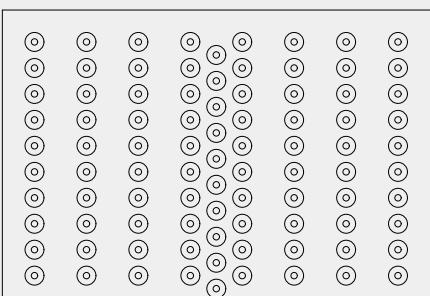

Star pattern

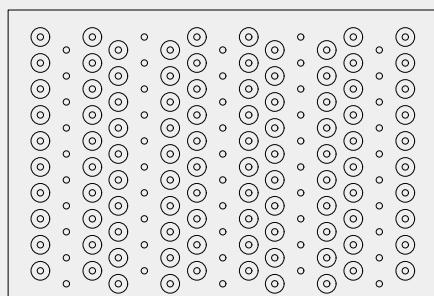

Square pattern

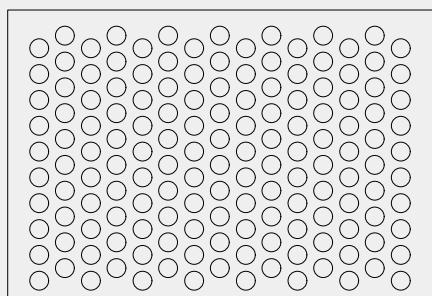

Rectangular pattern

OEM pattern

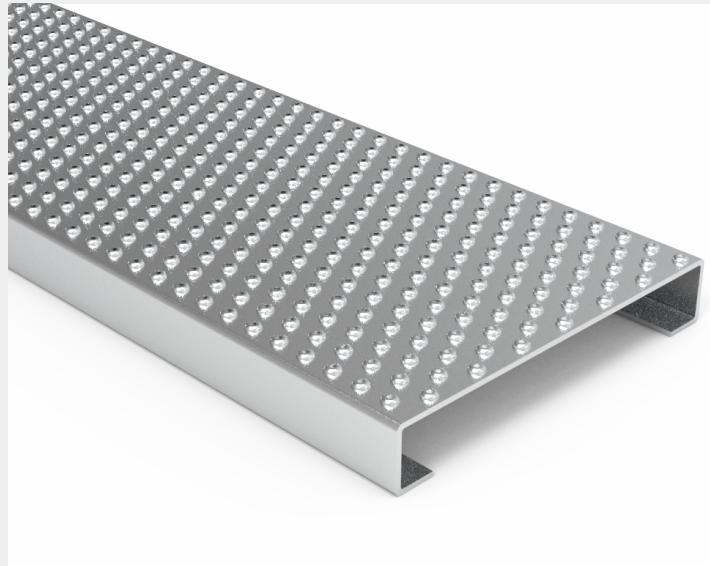

Drain hole pattern

Non-perforated pattern

TRACTION TREAD SAFETY GRATINGS
ARE COMMONLY USED AS

Plank

Hole diameter: 3/8".
Width: 7", 10", 12".
Length: 10', 12' or any cut length.
Channel depth: 1-1/2", 2"

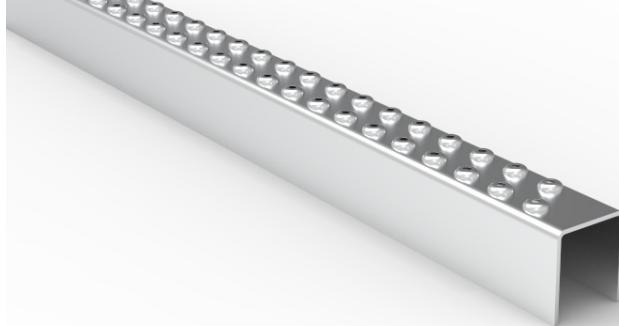

Stair Tread

Hole diameter: 3/8".
Width: 7", 10", 12".
Depth: 1-1/2", 2".
Length: 24", 30", 48" or any customized length.

Traction Tread safety gratings are commonly used as

Ladder Rungs

Hole diameter: 1/8"

Hole type: 2-hole, 3-hole, 4-hole.

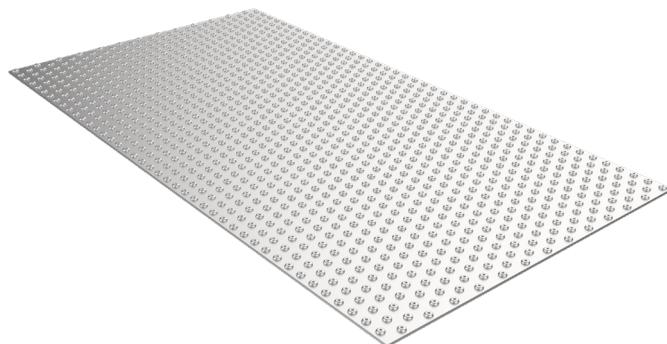

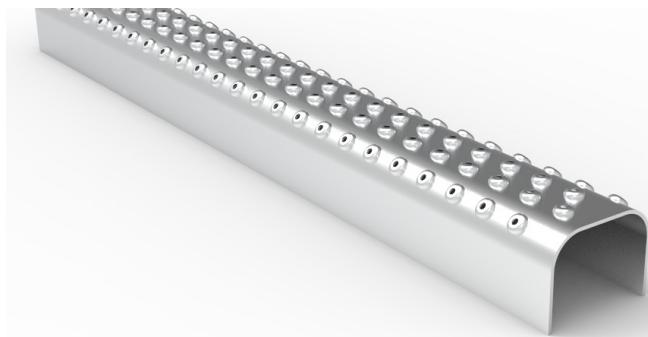

Width:

1-1/4"(2-hole), 1-5/8"(3-hole), 2-1/4"(4-hole).

Depth:

1-13/32"(2-hole), 1-13/32"(2-hole), 1-23/32"(2-hole)

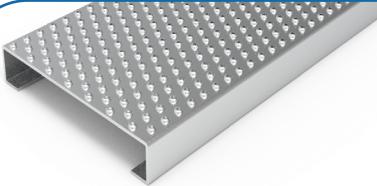

Length: 48", 60" or cut length.

Flooring Plate

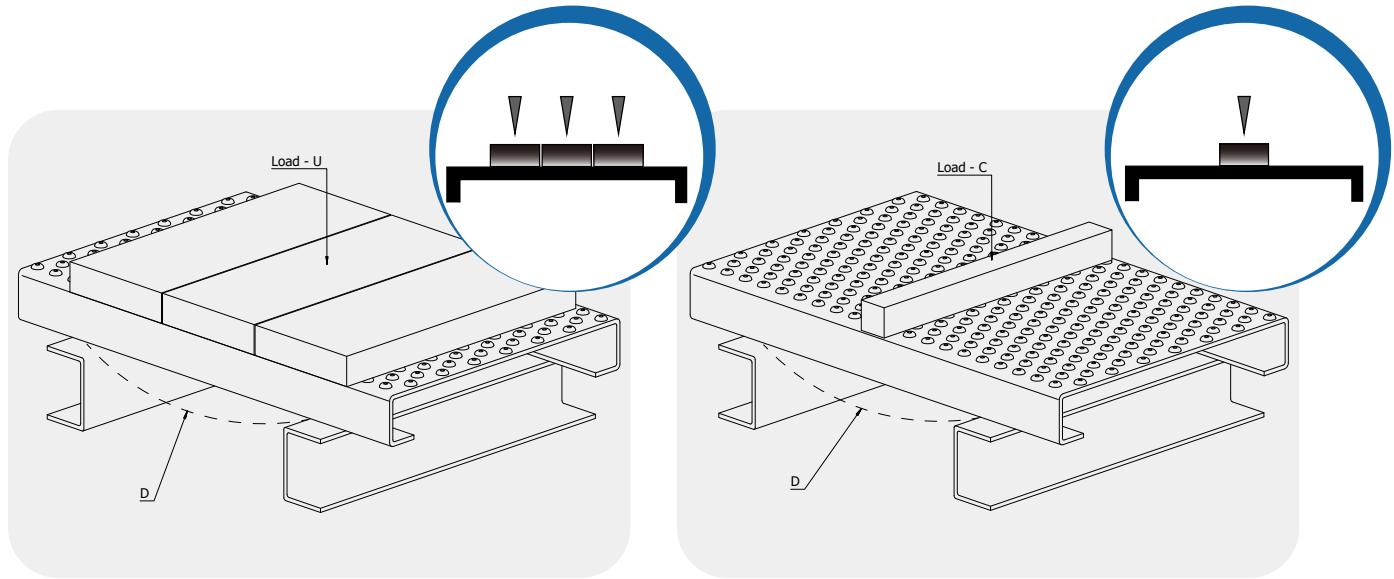

Hole diameter: 1/8"

Standard size: 3'x10', 4'x8', 1x2m

Traction Tread Plank Width: 10"

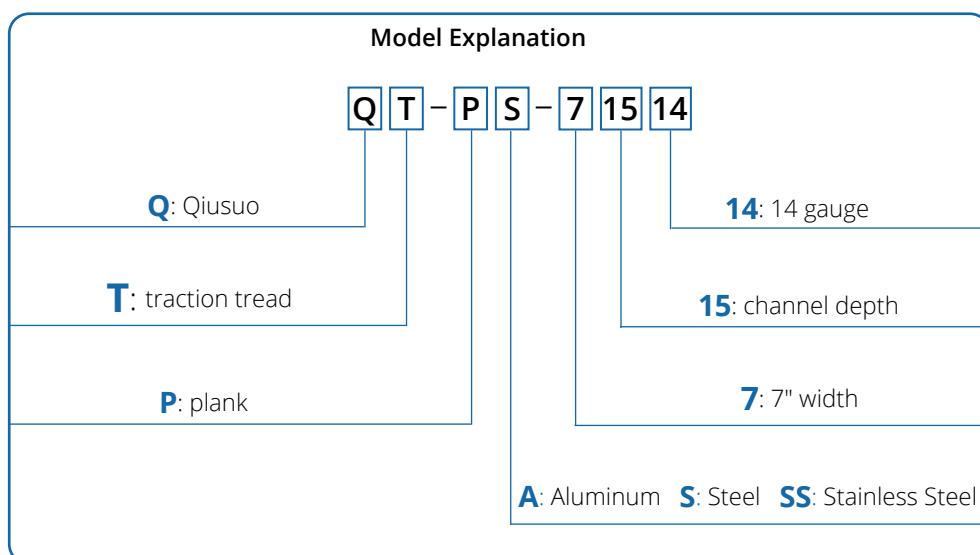

Key Parameter

Uniform Load

Concentrated Load

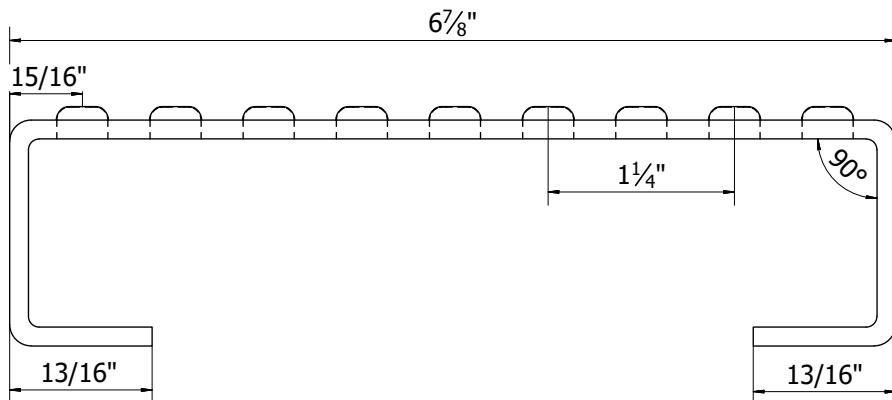

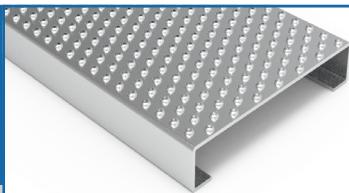

How to order

The following are **Safe Loading Tables** of parameters for different purposes.

Traction Tread Plank

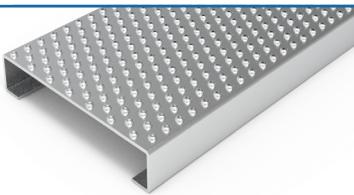

Width: 7"

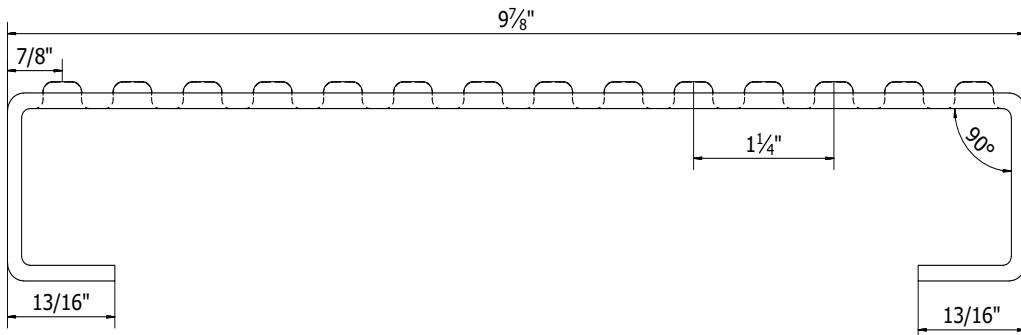

Load Table of Traction Tread Plank – 7" Width

U: uniform load (lb./ft.²) D=Deflection (in.)

Material Gauge	Channel Depth in. (mm)	Weight lb./lin. ft. (kg/m)	Catalog Number	Span
